According to the website and the charts, the channel is dredged to 6 ½ ft and 7 ½ ft at the docks. The channel is narrow and gets shallow very quickly on each side. You must honor the Red & Green markers at the beginning of the channel. There are large rocks on either side. Low tide is at 13:07, so if you arrive anytime after that you'll be on a rising tide in the event you run aground in the channel.
